

Late Filing

Dear FCC Commissioners & Staff:

As a small ISP in coastal Maine, I have been shut out of the DSL high speed market by Verizon's ridiculous pricing. They want to charge me \$66 per month for a blank circuit to my customer, and they are offering DSL at \$44 per month, but not here.

There is no service in our area, and Verizon has no plans to provide it for at least another year. I tried a year ago now, and Verizon shut me out. That is 2 years with no high speed access in Mid Coast Maine.

This is not an even playing field.

Sincerely,

Sean Rafter
